Subject: RE: MSGP Applicability - Perley's Marina

That didn't take long.
Give me a call if you want to discuss.

Subject: MSGP Applicability - Perley's Marina

Good Morning Thelma,
I received a copy of the US EPA's applicability determination letter for Perley's Marina dated June 22, 2017. EPA has determined that Perley's Marina is required to comply with the US EPA's 2015 MSGP due to stormwater discharge based on the modeling evidence provided by CLF and that AMEC's actual flow studies do not appear to be reliable indication of what is occurring at the site. Accordingly, the Perley's have asked AMEC Massachusetts, Inc. to support them with this permit coverage. However, prior to AMEC supporting the Perley's with this matter, we respectfully request a site meeting with you to assist us with the identification of the actual point source identified by CLF's model. Please note that we reviewed this model with CLF at the site during their site inspection and they could not identify/point out the location of the point source presented on their model. Specifically, we need support identifying the point source for the drainage area with industrial activities exposed to stormwater prior to seeking permit coverage. Please let me know when it would be a good time for you and I to meet at the facility to investigate modeled point source location and if you would like to have a call prior to going out to the site to discuss your June 22, 2017 letter.
